

Camera Prep Bays Rentals

Prep Bays are dedicated spaces on the rental prep floor for clients to build their camera packages. Each bay is equipped with a custom rail based focus chart, desk space and AC power. But most importantly clients will have full access to the support of our trained technicians to solve any problem during their prep.

Each Prep Bay is large enough for 1-2 people and space to build 1-2 cameras. If more people or equipment needs to be at the prep, additional bay space needs to be allocated.

Prep Bays are always available for free when the minimum \$1000 day rental is met.

For clients that do not meet the minimum rental, but need to prep their equipment at our facility there, will be a \$450 daily rental for each bay required.
